

Single Case Agreements

A Single Case Agreement is a one-time negotiation between a physician or provider group and an insurance company of which you are not currently in contract. These out of the network providers may negotiate higher dollar claims in order to receive payment from the patient's insurance company.

ARC Healthcare has a proven history of handling Single Case Agreements (SCA). Our work frees up insurers to handle other important issues while providing a level of expertise that many providers do not possess. All of which facilitates patient access to out-of-network providers.

There is a risk that a Single Case Agreement cannot be negotiated prior to the patient receiving services. In some cases providers simply do not have the time to negotiate the SCA, which leads to financial losses should the patient end up slow paying or worse yet, not paying at all. Even in the best of circumstances, the process often includes a great deal of back and forth and proves to be very costly and time consuming.

The team of experts at ARC Healthcare works with the insurance companies on your behalf and makes recommendations for future Single Case Agreements. This allows you, the care provider, to get back to your patients' needs; which is why you built your practice in the first place

Let Our Expertise Become Your Advantage
